

OUR CITY FOREST

Flower Unicorn Art Project

It's time to get creative! This is a great project for kids or for anyone feeling expressive or artistic. Show your kids that they can use materials from their urban forest to create art! Leaves and flower petals laying around your garden can turn into your child's favorite animal. Feel free to use these guidelines to create other animals as well.

HOW TO MAKE: A Flower Unicorn

This unicorn is a fun and easy craft for kids that makes a beautiful decoration! This can be done with any color or plant.

Materials:

- Cardboard
- Flowers/leaves (try to use ones that have already fallen)
- Double-sided tape
- Marker

Step one:

Draw the unicorn. It doesn't have to be perfect! Any other animal with a mane works too! (Ex: Lion)

Step two:

Stick small strips of the double-sided tape on the sections of the mane.

Step three:

Gather your flower petals, whole flowers, or leaves, and stick them onto the tape strips. There you go! An easy yet fun art project that kids will love.
